**MYANMAR DRILLING UPDATE:  
DRILLING COMMENCEMENT OF  
CHAUK DEVELOPMENT WELL CHK 1236**

Interra Resources Limited (the “Company” or “Interra”) wishes to inform shareholders that its joint venture entity, Goldpetrol Joint Operating Company Inc. (“Goldpetrol”), has commenced drilling development well CHK 1236 in the Chauk oil field in Myanmar.

Interra has a 60% interest in the Improved Petroleum Recovery Contract of the Chauk field and also owns 60% of Goldpetrol which is the operator of the field. CHK 1236 is being drilled using hired ZJ 750 rig, and Interra’s share of the cost of drilling is funded from existing funds on hand.

CHK 1236 is drilled in the SBL-54N fault block of south central Chauk field as a vertical offset development well to CHK 1096. CHK 1236 has the primary objective of accelerating production from the oil reservoirs that currently produce from CHK 1096 and with respect to there being no other current oil producers in the block, positive appraisal results could lead to additional drilling.

CHK 1236 is the eighth 2022 budgeted well drilled by Goldpetrol. Interra estimates that the results of the drilling and completion should be available in approximately six weeks. The Company will announce the results of the drilling operation as soon as they may be ascertained.

By Order of the Board of Directors of  
INTERRA RESOURCES LIMITED

Marcel Tjia  
Chief Executive Officer

**About Interra**

Interra Resources Limited, a Singapore-incorporated company listed on SGX Mainboard, is engaged in the business of petroleum exploration and production (E&P). Our E&P activities include petroleum production, field development and exploration. We are positioning ourselves to become a leading regional independent producer of petroleum.
